
TYSEA MFG INC.

HEAVY DUTY HYDRAULIC WHEEL LOADER & MOTOR GRADER ANGLE BLADES

Tysea's heavy duty snow blades are extremely durable, ideal for snow clearing, grading and land leveling on urban and rural terrains. Left and right hydraulic angling provides the operator with increased material control during operation all from within the cab. Wheel loader linkage allows the operator to angle the blade forward and back to adjust cutting and grading depths.

Standard with all Models:

- 30 ° left and right angles
- 2 Heavy duty bolt on cutting edges, smooth or serrated
- Adjustable skid shoes (increase life of cutting edges)
- Heavy Duty design
- Hydraulic cross over relief valve

Customize:

- 10' – 20' Blade widths
- 3 ° oscillation
- Quick change or pin on lugging
